Things of science Will Bring You Monthly "Magic"
from the Laboratories of Man and Nature

WHAT DO they look like, these strange and exciting products, made by scientific man—or taken from Nature's own laboratory? Now you can see for yourself!

Membership in THINGS of science will bring you each month a scientific surprise package, packed with new or unusual items of science. In each package is a booklet of clear instructions for unusual experiments and interesting, authoritative background information.

By yourself or with a group you will perform fascinating experiments and demonstrations—the essential materials are furnished in your THINGS box. You can even build up an extensive and unique science museum of your own. Here are scientific fun, valuable knowledge, mental stimulation, hours of absorption, future hobbies!

NON-WOVEN FABRICS • CRYPTOGRAPHY

CHEMICAL MODELS • CRYSTALLIZATION • SOILLESS GARDENING • ANCIENT GEMS • POLYSTYRENE PLASTIC

See the INSIDE of the SCIENTIFIC REVOLUTION!

MAN MAKES CLOTH FROM COAL, AIR AND WATER . . . MAKES NEWSPRINT FROM SUGAR CANE
. . . MAKES PLASTICS TO REPLACE METAL, WOOD AND FIBER . . . MAKES DISAPPEARING THREAD

The response to THINGS of science—began several years ago by Science Service—was so enthusiastic that it was a problem to keep up production of units with the demand for membership. We have now successfully arranged for increased production to accommodate a limited number of new members. Because Science Service is a nonprofit institution devoted exclusively to spreading scientific knowledge, membership dues in THINGS of science are extremely modest. \$6.00 a year brings you 12 challenging, engrossing kits from the world of science.

You are urged to mail promptly the application form and your remittance so that you can be enrolled before the quota for the next unit is filled.

THINGS of science
Washington, D.C. 20036

**"The most education
in a small package!"**

**"The fun and adventure of
experimenting in science."**

**Wide coverage of
the scientific field . . .**

Physics

- Motor • Pendulum
- Sound • Static Electricity
- Color Top • Magnetic Force

"I particularly like THINGS of science because they introduce so many different fields and a wide variety of subjects. I am pleased to have my boy working on these things rather than just reading about them."

Chemistry

- Chemical Models • Crystallization
- Test Papers • Chromatography

"We consider THINGS of science most interesting and worthwhile presentations of basic scientific ideas."

Mathematics

- Computation • Hexaflexagon
- Measurement • Straight Line

"My son is reaching the age where his curiosity is continually requiring answers. I have found your kits ideal in accomplishing the necessary instruction both simply and more adequately than I am able."

Biology

- Butterflies • New Seeds
- Seed Germination • Soilless Gardening

"Our seventh and eighth grades have enjoyed the THINGS kits very much. We find them fast becoming a good supplement to our science course."

Industrial Materials

- Corrosion Inhibitors • Steel Wire
- Polystyrene Plastic • Non-Woven Fabrics

"As an engineer, I often marvel at the clever, well designed units you furnish. In my opinion these go a long way towards stimulating an interest in science."

"Our gratitude for many hours of enjoyment and excitement resulting from the monthly arrival of the little blue box."

"My son took the latest THINGS kit to school with him, and his teacher was so pleased with it she sent word home asking could I possibly obtain another which she might keep as a permanent teaching aid."

"An exciting; stimulating and very worthwhile experience every single month."
"Several years ago my son enjoyed your wonderful monthly surprise packages. Today he is a college graduate and on his own. Our young daughter approaching her teens is interested in science. I hope you still have this wonderful THINGS of science."

"THINGS of science—the 'whipped cream' of teaching."

Miscellaneous

- Ancient Gems • Astronomy
- Kaleidoscope • Spectral Color
- Optical Illusion • Sextant • Lens

**"The ideal way to stimulate
interest in science"**

1719 N STREET, N.W.

WASHINGTON, D. C. 20036

ONCE A MONTH for a year we will pack a blue box or envelope with scientific fun, with mental stimulation, with hours of absorption, with future hobbies, with knowledge; but specifically we will pack them with THINGS of science . . . real objects of science to be handled and looked at and owned by you. And with them we will send booklets of suggested experiments and complete explanations.

There are now more than thirty thousand members of the group of friends of science who receive one of these exciting packages each month. This unusual service comes one year postpaid for \$6.00 (outside U.S.A. add \$1.50 per year for extra postage).

You are eligible for membership in this limited group. Use the priority New Member coupon to complete your enrollment so that we may reserve a place for you.
